Abstract

In listening to a lecture on a dozen undeciphered scripts, I noticed that they all originate from places where the Jews migrated which has been describe I various papers by this author. I propose that the unciphered texts are related to the lands where Jews were known to live. I provide some keys to aid the reader in his/her research so that the scripts will soon be deciphered.

Introduction

Table 1:

Approx. date	Script / inscription	Location	Status
c. 1850–1450 BCE	Linear A	Crete	Deciphered
2nd millennium BCE	Byblos syllabary	Lebanon	Deciphered
c. 1800 BCE	Wadi el-Hol	Egypt	Not securely deciphered; debated as early alphabetic writing
c. 1800 BCE	Sinai inscriptions	Sinai	Deciphered
c. 1800 BCE	Sitovo inscription	Bulgaria	Undeciphered
c. 7000–3000 BCE	Vinča signs	Balkans	Whether these constitute writing is debated
c. 5000 BCE	Dispilio	Greece	Deciphered
c. 5300 BCE	Tărtăria tablets	Romania	Symbols; interpretation highly controversial
Iron Age	Pictish symbols	Scotland	Not a securely deciphered writing system
c. 650 BCE	San Andrés/Olmec signs	Mexico	Interpretation as writing remains debated
3rd millennium BCE	Indus/Harappan script	Indus Valley	Deciphered

According to a video listed in the references, there are 12 min written scripts that have not been deciphered. I noticed that all 12 are where the Jews had been Table 1. They are:

The Jews (sticky snow) started out in the Indus Valley along with other major world religions. The left for Sumeria before migrating on to the area occupied by the Hittites. Then they went to the Canna and migrated to Egypt. In Egypt Moses was in contact with the Minoans. [Moses, the Minoans & the Orb]. The Minoans migrated to Phoenicia. Israel captured the land of Israel after moses received the 10 Commandments from YHWH on Mt Sini. The tribe of Manasseh migrated to the East where they stopped in the Indus Valley, China, and Japan before making their way to Mexico: the Maya. The lost

tribes of Israel went West to Scotland as DNA evidence is showing. The common link in all these scripts is the Jewish people. We've already deciphered the Harappan script. We've also linked the Hittites script with the Harappan. [More on the Harappan Script] [Harappan in Egypt as Pharaohs] [Deciphering the Ancient Text of the Indus Valley: King Sargon of Akkad] [Where Did Astrotheology Originate; And Manasseh's Empire in India] [Harappan as Proto-Jews] [Homer and Shakespeare: A Jewish Princess and the Scottish Queen] [On Shem, Ham &The Harappan Script]

My best guess is that all these scripts descend from Egyptian, Phoenician (Minoan); Hittite, and Harappan. Japanese too may provide a clue Figure 1,2,3,4,5,6.

Actually deciphered, so this should not be on a list of undeciphered scripts

Google Autodetect: Maltese

Maltese People

The **Maltese people** (Maltese: Maltin) are an ethnic group native to the island nation of Malta in the Mediterranean Sea, which also includes Gozo and Comino. They speak **Maltese**, a **Semitic language** derived from Siculo-Arabic with significant Romance influences [1], and are predominantly **Latin Catholic**, which remains the state religion [Wikipedia]. The modern Maltese

population descends largely from settlers from **Sicily and Calabria** who repopulated the islands after depopulation following the Aghlabid conquest in AD 870 [Wikipedia]. Malta's history includes influences from Phoenicians, Romans, Byzantines, Normans, and Aragonese, creating a rich cultural and genetic heritage [Wikipedia]. Gozitans, the inhabitants of Gozo, are considered a subgroup of the Maltese [Wikipedia].

Conclusion

It is suggested that all these mentioned translations involve the Jews. They occupied the areas where the tablets were found. This is not the solution, but a step that may result in the solution of the translations of these linguistic puzzles.
